# MICHAEL OTU ASAMOAH

MANAGING DIRECTOR

(DIP IN ACCOUNTING, BBA - BANKING AND FINANCE,  
MBA - OPERATION, LOGISTICS AND SUPPLY CHAIN MGT.)

**W**e acknowledge your precious time spent in going through our profile. MODU Engineering Services Limited (MESS) is a solely owned Ghanaian company that places client satisfaction at the core of our activities. We never compromise on safety and speed of work is just part of us.

The spectrum of our operations encompasses welding, fabrication, Civil works, electrical, hire and sale of scaffolds and contract engineering. We are also into logistics, transportation and hiring of heavy duty machinery and equipments.

We aspire to grow by improving on employee quality and more efficient operations by transforming global strategies into local core competencies for competitive advantage.

Our doors are warmly opened for both local and foreign partners who believe in a win - win approach for business. Thank you for considering our proposal and we hope to hear from you soon for a wonderful working relationship

God with us

**GARRY SHIPARD**  
GENERAL MANAGER  
(PROJECTS)

I've been in the Mining Industry for over 40 years now in diverse working environments ranging from Oil & Gas and Gold. I have had a lot of experiences with the people I've worked with and the communities as well. I must confess they have all taught me a lot & I enjoyed it a lot during my time in that area.

I bring my experience to bear into MODU ENGINEERING SERVICES LIMITED in all the diverse fields of mining from construction to processing including Civils, Structure, Mechanical, Piping (SMP), Electrical & Instrumentation. I always strive to make my working teams very happy but safety is never compromised under my watch. Thank you for giving us the opportunity to serve you and we look forward to doing a win-win business with you.

## MISSION STATEMENT

We present a new wave of engineering that exceeds our client's expectation through a professional and customized approach.

## VISION STATEMENT

To be a leading engineering company with global strategies transformed locally for progressive improvements.

## focus

**W**e delight our clients with the best of services, making effective use of time and other invaluable resources to its fullest, whilst we beat deadlines in a safe and congenial working environment.

We adhere to safety and high quality control standards. Our priority is to be able to deliver beyond our customers' expectations, at a very affordable price but never compromise on quality. With our expertise, our client is relieved by subletting to us jobs in Civil, Structure, Mechanical and Piping (SMP), Electrical and Instrumentation, Mining Supplies, Logistics and Transport whiles concentrating on their core

# Core Values

## SAFETY

We at MESS believe in creating a good “mess” taking into cognizance the highest safety standards. Safety is our highest value and we never compromise on safety.

## PEOPLE

The core of our activities is executed by people and thus people development, skills training; employee motivation coupled with job satisfaction is our priority.

## VALUE FOR MONEY

In delighting our clients we go beyond the extra mile by providing them with the best service quality at a very affordable cost. Our objective is to always leave a lasting impression on the minds of our clients and hence provide our clients with an unconditional service guarantee.

## SPEED

We believe in prompt delivery to the needs of our clients with the highest speed, accident free and the best of quality. Our sense of urgency spans right from the commencement, execution and completion of a given project to beat or meet deadlines.

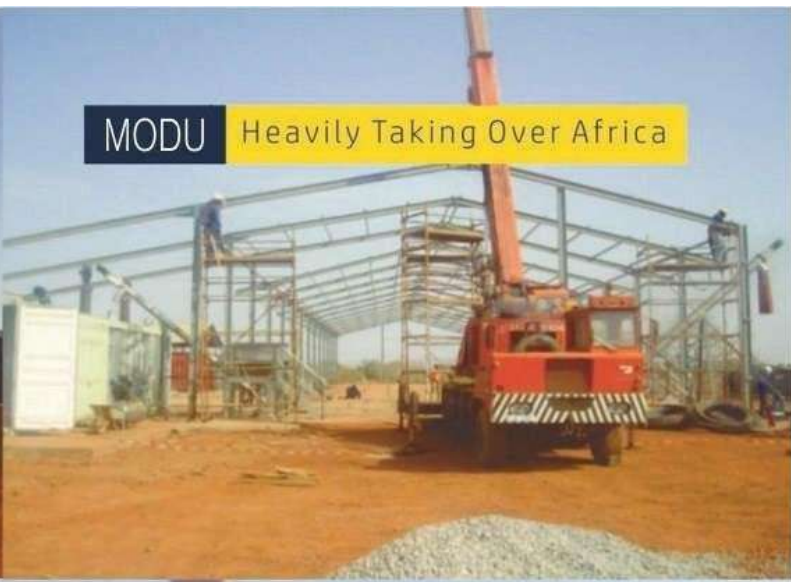

## ENVIRONMENT

The external and internal environment is very dear to our activities and so we passionately seek to protect it with all resources available to us. We conduct our activities in a well organized manner so as not to cause any form of destruction to our clients’ environment and the community we operate in general.

## GROWTH

We strive to grow in our operations, systems and service quality. We hope to be a global player in the engineering industry with client satisfaction and people development at the centre of our growth strategy.

# SAFETY POLICY

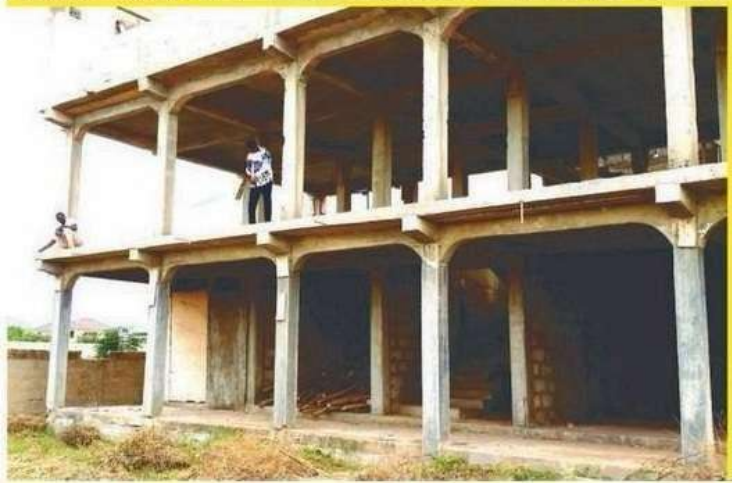

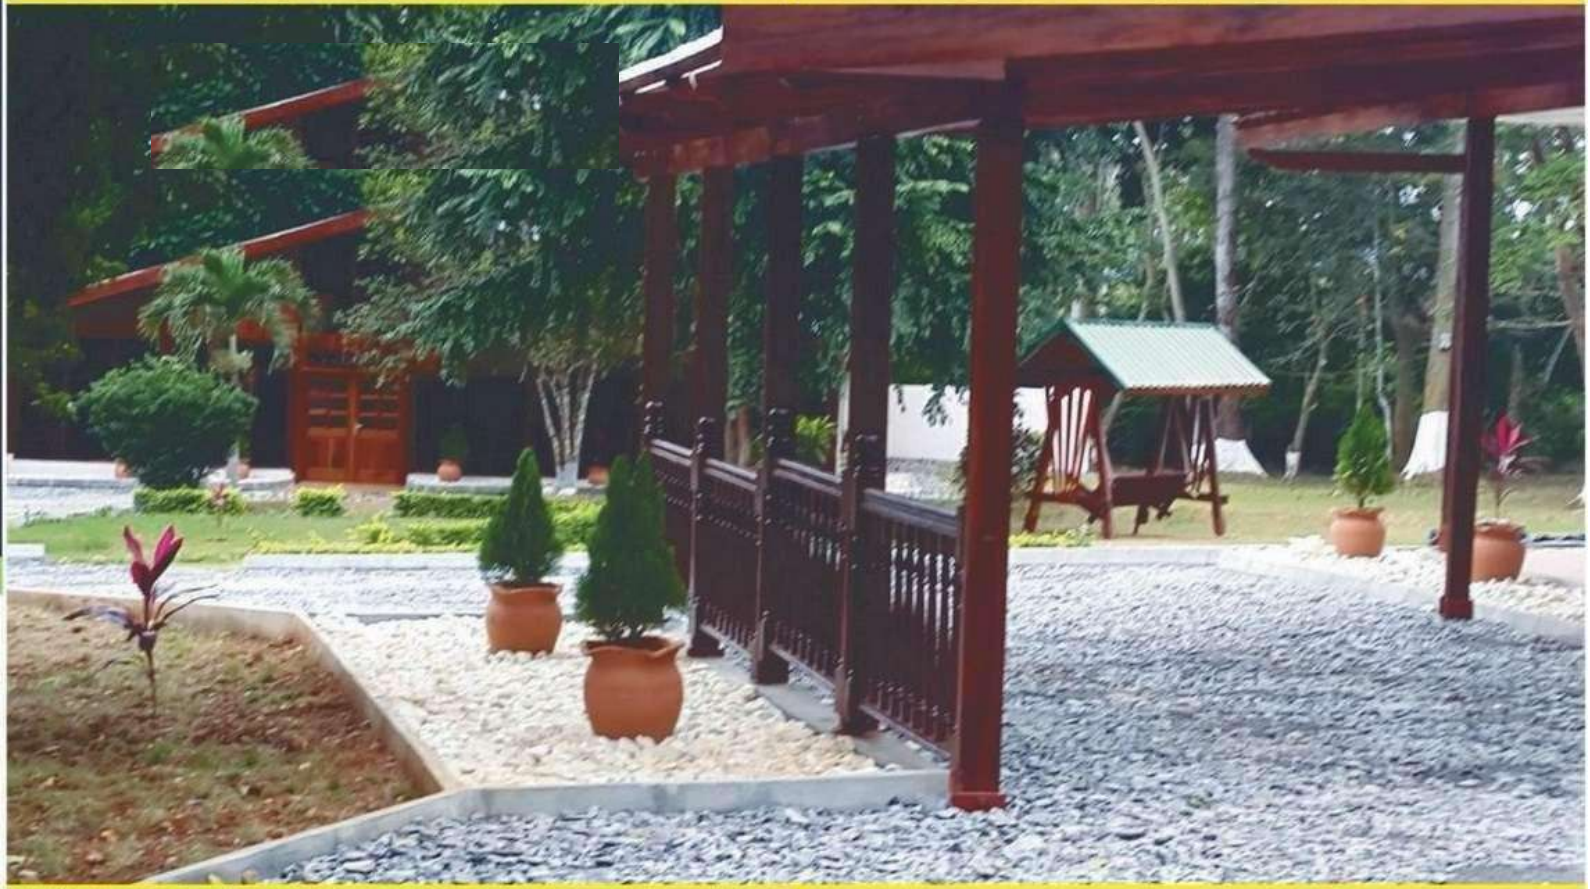

MODU | Heavily Taking Over Africa

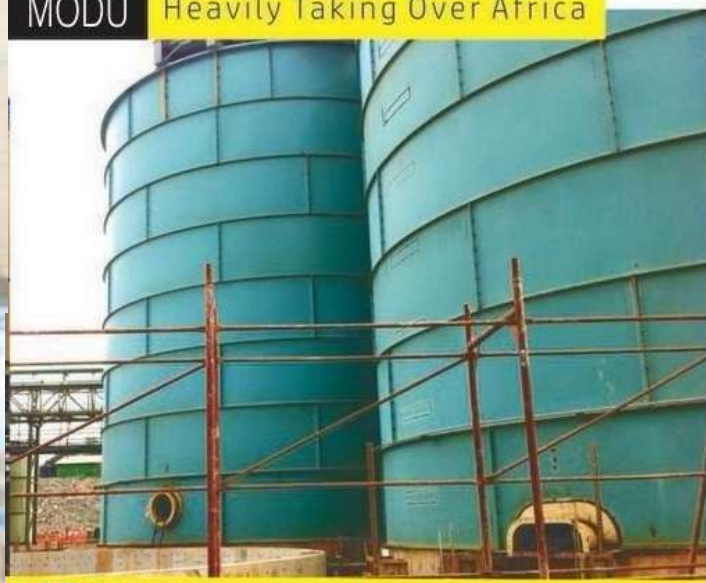

**W**e at MODU Engineering services Ltd. (MESS) believes in creating an organized "mess" in a safe and congenial manner. The Company as well as its personnel are committed to maintaining a safe and injury free working environment and to be compliant to all associated laws and regulations.

To accomplish this goal, we will commit the necessary engineering and technical resources, encourage safe work attitudes, consistently offer safety training and disciplining throughout the organization.

In conclusion, we would want to assure you, that we are committed to guarantee our personnel safety as well as the safety of those around us for a friendly working relationship

## CIL TANKS AND STRUCTURES

# MILL LINER INSTALLATIONS & MAINTENANCE

We are experts in Mill Liner installations and maintenance. We do Steel, Polymet and Rubber Liners. We are the sole installation contractor for TEGA HOLDINGS PTY and we have cut the length and breadth of various Mines in West Africa including others in Egypt and the United Arab Emirates (UAE).

Some of the Mines that we consistently go all year round are Asante Gold Ghana Ltd (Chirano), GoldFields Ghana (Damang-Mine), Barrick Gold Mine (Lolou - Mali), Sky Gold Mine (Taparko - Burkina Faso), AngloGold Ashanti (Siguiri - Guinea), Burkina Gold Mine (Youga - Burkina), Resolute Gold Mine (Syama - Mali), Orezone Gold Mine (Burkina Faso), New Liberty Gold Mine (Avesoro - Liberia), NordGold SMD LEFA Mine (Lero - Guinea).

# SULPHIDE CONCENTRATE RECOVERY PROJECT - Civil works

Sulphide Concentrate Recovery Project for Asante Gold Bibiani Ltd.  
Consultant: JET-ROM Engineering Ltd.

MODU Engineering is executing the Sulphide Concentrate Recovery Project for Asante Gold Bibiani Ltd, with consultancy support from Jet-ROM Engineering Ltd. This project aims to improve gold recovery rates from 65% to 92% by implementing an effective processing system for sulphide ore at a target processing rate of 4.0 Mtpa. The scope includes designing and installing a flotation circuit for sulphide concentrate generation, fine grind milling for concentrate handling, and pre-leach and Carbon-in-Pulp (CIP) systems with pumpcell mechanisms for intensive cyanidation, leaching, and adsorption of gold. Additionally, a pre-feasibility study has been conducted to deliver Approved for Construction (AFC) drawings and capital cost estimates (Capex) for project implementation.
